

# DONNER PASS

The Most  
Important  
Historical  
Square Mile in  
California

*The view from the crest of the Sierra to the east, is inexpressibly, comprehensive, grand and picturesque.*

*Edwin Bryant  
What I Saw in California, 1848*

The “view” in Edwin Bryant’s quote above was from the top of Donner Pass after “leaping our animals from crag to crag, and climbing in places nearly perpendicular precipices of smooth granite rocks.”

Standing at the top today, the view is still “inexpressibly ... grand and picturesque” and we can see the crags and perpendicular precipices that caused one of Edwin Bryant’s mules to somersault backwards down the route they had taken. (The mule was not hurt.)

Edwin Bryant, standing atop Donner Pass, was looking down the Summit Canyon onto what is today the most historically important square mile in California. Nowhere in California is there such richness in history.

Standing on Donner Pass you are surrounded by history and the presence of the people who crossed the pass to make California what it is today.

### **Native Americans**

For thousands of years Native Americans used the pass to cross Donner Summit in summers to hunt and trade. Their petroglyphs are incised in many places into the granite of the pass

and the Summit. No one knows what the mysterious markings mean.

Using almost the same route the first California-bound wagon trains, the first transcontinental railroad,

the first transcontinental highway, the first transcontinental air route, and the first transcontinental telephone all came up Summit Canyon, through Donner Pass, and over Donner Summit.

Once the railroad was completed the first transcontinental telegraph moved to Donner Summit as well.

### **First Wagon Trains, 1844-46**

The Stephens-Murphy-Townsend Party was the first wagon train to reach California, doing so in 1844.

They approached the Sierra after a grueling journey across the Nevada desert and along the Truckee River. As they climbed the Pass it was snowing as they came to a rock wall. There appeared to be no way to pass save a small cleft that an ox could just

go through. The party disassembled some of their wagons and hoisted the pieces up. The rest of the wagons were left at Donner Lake, along with a teenage Moses Schallenberger, who would stay the winter. It is for him that Schallenberger Ridge on the south side of Donner Lake is named.

At the Stephens' Party camp at Big Bend, on the Yuba River, just a few miles past the summit, the first white baby was born in California, Elizabeth Yuba Murphy.

### **First Transcontinental Railroad, 1869**

Fighting avalanches, accident, fire, and blizzards the mostly Chinese workers of the Central Pacific built a railroad shoveling, digging, blasting, carting, and cutting. They filled ravines, excavated and laid track. Then they built forty miles of snowsheds to protect the track from the average 34 foot snowfalls. Ironically the snowsheds blocked passengers from seeing Edwin Byrant's view. The picturesque sights were replaced with smoke-filled snowsheds.

The Chinese workers' crowning achievement was

blasting fifteen tunnels through the solid Sierra granite. Some of the tunnels, including the longest which took two years to bore, along with snowsheds, sit overlooking Summit Canyon.

With the coming of the railroad it suddenly it took only days to get to California, averaging an incredible 22 miles per hour, instead of months. Letters brought news that was still “news.”

The railroad opened California and united the nation. It brought settlers, business, and ideas and in exchange it took the products of California to the

rest of the nation. The first transcontinental railroad went right through Donner Pass.

### **First Transcontinental Highway, 1913**

In 1913 the Lincoln Highway was inaugurated and it included a stretch through Summit Canyon. It put together stretches of road all across the country to form America's first transcontinental highway and to be the first national memorial to Abraham Lincoln. With the new highway, independent travelers could more easily explore the Sierra and travel the country. Until the overpass (pictured here) was built, autos

approached the snowsheds, opened the door, listened for approaching trains, and then hurried across the tracks

through the door on the opposite side. There were collisions in Summit Canyon.

You can see sections of the highway, and hike them, on Donner Summit and down

Summit Canyon to Donner Lake. Along the way, look for old advertisements painted on the rocks, for old bridge abutments, and other evidence of the highway.

### **First Transcontinental Air Route**

The first transcontinental air route used Donner Pass too. Beacons, ground markings, and arrows guided flyers through the Pass in the days before radar and high altitude flying. A beacon and a little house housing a weather station sat at the head of Donner Pass overlooking Summit Canyon. It sat above today's Donner Ski Ranch, on Signal Hill. It was airway station 15. On one side of the roof "Donner" was painted and on the other, "SL - SF" (Salt Lake-San Francisco) so pilots knew where they were and where to go next.

# Hwy 40 Scenic Bypass

## Charlie Chaplin's Gold Rush

### History

Law - Johnson - Patten - Brown Road to "Starfield Road" (back view from a legal firm's office building).

"The only truly" artistic, original, detailed, and accurate Charlie Chaplin's "The Gold Rush" film scene from 1925 was made in the Sierra Nevada mountains near Donner Summit and is now the site of the bypass. The 1925 film was the highest-grossing silent comedy.

Charlie Chaplin and his director, Douglas Fairbanks, and the film crew spent 10 weeks in the area and thousands of dollars and thousands of miles to film "The Gold Rush" in the Sierra Nevada mountains. The film is a comedy about a man who is a gold miner and who is a gold miner. The film is a comedy about a man who is a gold miner and who is a gold miner. The film is a comedy about a man who is a gold miner and who is a gold miner.

### A Good Story

All that history would say "The Gold Rush" during the winter of 1846-47, many of the men sought refuge and Charlie sought the film.

The movie was based on the actual events of the winter of 1846-47. The movie was based on the actual events of the winter of 1846-47. The movie was based on the actual events of the winter of 1846-47. The movie was based on the actual events of the winter of 1846-47.

### Things to do right here

From here you can hike to the scenic gold country. You can hike up to the top of the mountain. You can hike up to the top of the mountain. You can hike up to the top of the mountain. You can hike up to the top of the mountain.

11000 Donner Summit Road, Donner Summit, CA 95724

# 20 Mile Museum

Visit the Donner Summit Historical Society's 20 Mile Museum with interpretive signs from Nyack on I-80 at Emigrant Gap to below Rainbow Bridge on Donner Summit's Old Highway 40.

Like the example above, each sign tells the history of the spot, a good story, and activities to do right there.

The project and its 34 signs were conceived, implemented and supported by the Donner Summit community and are part of the National Geographic's Geotourism project.

For more information or to receive free The Heirloom, monthly stories about Donner Summit history go to: <http://www.donnertsummithistoricalsociety.org/>

# Traveling Summit Canyon 1845

“You can form no idea, nor can I give you any description of the evils which best us. From the time we left the [Donner] lake ...until we reached the top it was one continued jumping from one rocky cliff to another. We would have to roll over this big rock, then over that; then there was bridging a branch; then we had to lift our wagons by main force up to the top of a ledge of rocks...Three days...found ourselves six miles from the lake...you never saw a set of fellows more happy than when we reached the summit.”

William Todd 1845
